# **ZERO COMPROMISE**

**[www.insta-pipe.com](http://www.insta-pipe.com)**

# Improve the pipelines of your community and its well being through trenchless solutions.

Much of the water infrastructure in the US is aging and in serious need of replacement or upgrading. Insta-Pipe wants to relentlessly address this critical problem. And it starts with your next public or commercial infrastructure project. The first step starts with scheduling an initial pipe inspection and consultation. This gives us valuable insight on your infrastructure. Allowing us to recommend and provide the right solution for you.

## Public Infrastructures

**Building a more secure and more resilient public infrastructure will increase the quality of life for everyone.**

Insta-Pipe wants to be the driving force behind replacing the aging infrastructure in the nation one community at a time. But we understand you're grappling with newer problems, such as emerging water-safety challenges and implementing new technology to provide effective and affordable solutions. We'll ensure we reach your specific budgetary, environmental, and other relevant community goals.

## Private Infrastructure

**Private infrastructure has been moving toward greater sustainability. But, the level of renewal and reinvestment has not kept pace with the need.**

Our experienced team is ready to work on your project and help your community. We'll ensure we reach your specific budgetary and other relevant community goals. Insta-Pipe has completed many trenchless rehabilitation projects for several communities and industries. Our process will improve the operational efficiency of your infrastructure and extend its lifespan.

**Insta-Pipe delivers trenchless solutions for many within the private and public sectors. Our goal is to leave you 100% satisfied after completing your infrastructure project.**

---

*"I just heard that at last night's City Council Meeting there was appreciation and enthusiasm expressed about the ongoing CIPP work and project. Construction work typically does not get this reaction so good job everyone! I really appreciated the continued hard work from you and your whole crew."*

**- Khin G. - Bothell, WA**

## Providing You Sound Choices Backed By Sound Solutions

No matter what your role is, engineer, public works director, consultant; we understand the challenges of trying to determine the most efficient method of project execution. While addressing any environmental concerns raised by the proposed project. You need clear, correct, and consolidated information to make the best decision. At Insta-Pipe, we have the ability to provide a simple, guaranteed solution.

Much of our focus is on the many applications of CIPP lining. This method of lining is a great way to supplement and protect the pipe, without having to exhume it or remove it entirely. If you haven't ever had CIPP applied to your pipes before, you'll be amazed at how effective it can be. Our expert technicians have been providing this service method for years. And we can provide you with the perfect solution for your unique situation.

## Low Impact Solutions for the Environment

The environmental costs associated with asset infrastructure failures can be extensive. These failures impact many people surrounding the community. Some of the environmental costs can include:

- *Increased greenhouse gas emissions*
- *Noise*
- *Impact to natural resources*
- *Dust and debris*
- *And any more environmental impact due to uncontained fluid release*

Insta-Pipe provides environmentally friendly trenchless products and solutions. These are more friendly than the traditional methods of CIPP (steam/water cure). Our trenchless solutions address and minimize the environmental effects of infiltration and inflow. Allowing us to protect the community and improve asset infrastructure.

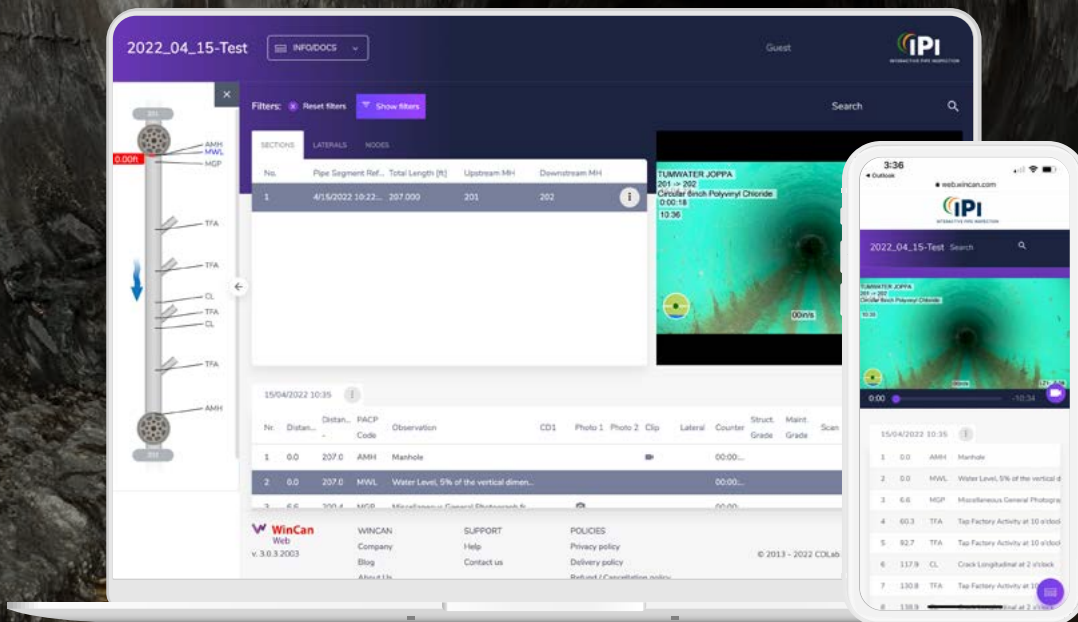

# Going Beyond What's Demanded

When it comes to asset management, you need lasting solutions. That's why we always strive to do more than what's expected or required. Insta-Pipe is relentless to find the best solutions to your specific problem. And it starts by getting an accurate assessment of your current assets. In partnership with Interactive Pipe Inspection (IPI), we conduct an **INREACH™ Assessment**. To understand your assets true condition we use the latest inspection technologies. Some of which are 1800p high definition cameras, lateral launch, 3D manhole scanning and panoramic imaging. All on-site operators are PACP certified and go the extra mile to provide you with deep

After your **INREACH™ Assessment** we present and recommend the best course of action. In this process, our experienced and expert technicians explain our recommended solutions. Most are technologies in trenchless repair and rehabilitation. Giving you the lasting solution you're looking for. At Insta-Pipe, we know the different challenges that you may be facing. Sometimes it's financial, environmental, or even social. We want to be proactive and rehabilitate and repair your existing assets. Rather than continue to repair costly emergency brakes. This requires us to be adaptive and versatile to solve your problems.

## INREACH™ ASSESSMENT

INTERACTIVE PIPE INSPECTION

# ZERO COMPROMISE

Project Zero represents our comprehensive approach to achieving excellence. It revolves around three core principles: zero accidents, zero environmental incidents, and zero defects in our work. Through this initiative, we prioritize the safety of our team members, clients, and the environment.

To ensure utmost safety, we implement stringent protocols and provide continuous training to our team. By adhering to industry best practices, we guarantee that every project is executed with the utmost care and attention to detail.

A background image showing construction workers in safety gear (hard hats, high-visibility vests) working on a trenchless pipe repair project. They are surrounded by orange plastic sheeting and equipment. The image is partially covered by a blue circular graphic on the right side.

*Commitment to...*

**ZERO**  
**SAFETY INCIDENTS**

**ZERO**  
**DEFECTS IN OUR WORK**

**ZERO**  
**CLAIMS IN OUR WORK**

At Insta-Pipe, we are also deeply committed to minimizing our impact on the environment. We embrace sustainable trenchless practices, utilizing eco-friendly materials and implementing proper waste management strategies. Our goal is to leave a positive environmental footprint while delivering exceptional pipe repair and rehabilitation services.

Quality is paramount to us, and we maintain rigorous control measures throughout every stage of the process. With our team of experienced professionals and state-of-the-art equipment and technology, we ensure that all projects meet the highest standards of precision and durability.

With Project Zero as our guiding principle, we strive to exceed client expectations and contribute to the overall improvement of pipe infrastructure systems. You can trust Insta-Pipe for reliable, efficient, and environmentally conscious pipe repair and rehabilitation services.

**EVERY PROJECT**  
is executed with the utmost  
care and attention to detail.

---

*"We successfully tackled the challenge that kept our client awake at night, working together as a unified team. The confidence we had stemmed from the exceptional talent that Insta-Pipe brought to the construction project, providing reassurance to both the client and engineer involved."*

**- Keith Larson - Operations Manager, Rodarte Construction**

## Solutions We Provide

At Insta-Pipe, we have the ability to provide you a simple, guaranteed solution. We'll give you the perfect solution for your specific situation. We offer the following types of solutions:

### Pipe Inspection & Data Collection

Understand your assets' true condition with the latest inspection technologies.

- 4K Panorama
- High-Def CCTV

### Pipe Renewal

Renew your pipes with trenchless technologies, including UV-cure CIPP, lateral seals, and potable pressure pipe lining.

- UV-Light Cured-In-Place Pipe (CIPP)
- UV-Light Cure Laterals, Seals, and Spot Repairs
- BulletLiner System™

### Pipe Cleaning

Increase the flow and capacity of your pipes with our various pipe cleaning methods.

## Recommending What's Right for YOU.

Insta-Pipe utilizes our knowledge in trenchless applications and the most innovative technology to deliver the best solution for you. We thrive when taking on challenging buried pipe inspection, service, or rehabilitation projects. Much of our solutions focus on trenchless technology and CIPP applications. Our expert technicians have been providing this service method for years, and can provide you with the right solution for your specific situation.

## Why Choose Us

Insta-Pipe utilizes our KIT to deliver the best solution for any buried pipe inspection, service or rehabilitation project, even if it's not a tool we can offer.

Our team has a combined 100+ years of KNOWLEDGE in trenchless applications. We utilize the most INNOVATIVE technology on the planet. Our TEAM is committed to delivering for our clients as proven with our zero call back record.

- KIT
- Innovative technology
- Industry leading knowledge
- Committed team of industry experts

Provide the right solution for your project even if it's not a tool we offer.

*"I want to thank you again for knocking this one out so quickly for us. Everything went great. Your crew was awesome."*

**- John Marchitto, Senior Civil Engineer Specialist**

## Our Story

Since 2006, Insta-Pipe has been providing comprehensive trenchless pipe repair solutions in the Pacific Northwest. In 2022, we saw a need for these services in the Southwest, opening a new division in Phoenix, AZ.

Insta-Pipe takes pride in developing lasting relationships with our clients - municipalities, military installations, industrial facilities and homeowners. Our expert team has deep experience in providing the right solution for the most challenging projects with a zero call back record. Our clients become long time partners.

Our focus has always been on delivering the most innovative solution for our client's trenchless pipe rehabilitation needs. Insta-Pipe was one of the first contractors to offer pipe bursting in the early 2000's and we continued that tradition of innovation today as one of the only UV light cure CIPP (Cured In Place Pipe) shops in the country. UV Cure has a longer lifespan, is more environmentally friendly and less disruptive to clients than other CIPP methodologies.
